

# OUR GRADUATE PROGRAM

Be future-ready with our program designed to develop your professional and technical skills to make an impact. Our two-year program enables you to experience various parts of our business and see our operations first-hand.

## What you will learn

In addition to technical skills you will learn a range of additional professional skills such as:

How to communicate with influence

The essentials of project management

Foundational leadership skills to shape your professional career

**And more!**

## How you will learn

## Program benefits on offer

- ▶ Mentoring and buddy opportunities throughout the program.
- ▶ Networking events with the Graduate community.
- ▶ A dedicated Graduate Coordinator who will be there to provide development support throughout the course of the program.
- ▶ Meaningful assignment rotations and exposure to add value with your project work.
- ▶ If you're an engineering graduate keen to obtain Chartership, participation in the program workshops will help establish your continuing professional development (CPD) portfolio.
- ▶ A bespoke small intake in the graduate program ensures that you are not just a number but you are seen and heard within a growing company.

Are you ready to embark on your Graduate journey?
