

ILUKA

Iluka Resources

Shareholder Focused Through the Cycle

David Robb, Managing Director
Bank of America Merrill Lynch Global Metals, Mining and Steel Conference
Barcelona, May 2013

Disclaimer – Forward Looking Statements

Forward Looking Statements

This presentation contains certain statements which constitute “forward-looking statements”. These statements include, without limitation, estimates of future production and production potential; estimates of future capital expenditure and cash costs; estimates of future product supply, demand and consumption; statements regarding future product prices; and statements regarding the expectation of future Mineral Resources and Ore Reserves.

Where Iluka expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and on a reasonable basis. No representation or warranty, express or implied, is made by Iluka that the matters stated in this presentation will in fact be achieved or prove to be correct.

Forward-looking statements are only predictions and are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks and factors include, but are not limited to:

- changes in exchange rate assumptions;
- changes in product pricing assumptions;
- major changes in mine plans and/or resources;
- changes in equipment life or capability;
- emergence of previously underestimated technical challenges; and
- environmental or social factors which may affect a licence to operate.

Except for statutory liability which cannot be excluded, Iluka, its officers, employees and advisers expressly disclaim any responsibility for the accuracy or completeness of the material contained in this presentation and exclude all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission there from.

Iluka does not undertake any obligation to release publicly any revisions to any forward-looking statement to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.

Non-IFRS Financial Information

This presentation uses non-IFRS financial information including mineral sands EBITDA, mineral sands EBIT, Group EBITDA and Group EBIT which are used to measure both group and operational performance. A reconciliation of non-IFRS financial information to profit before tax is included in the supplementary slides. Non-IFRS measures have not been subject to audit or review.

Zircon Attributes and Applications

Ceramics

Opacity (whiteness)

Water, chemical & abrasion resistant

Floor and wall tiles

Sanitary ware

Table ware

Refractory and Foundry

Heat resistant

Non-reactive

Steel & glass manufacturing

Precision metal casting

Zirconium Metal

Low thermal neutron absorption

Corrosion resistant

Nuclear reactor cores & fuel rods

Heat exchangers

Zirconia & Zirconium Chemicals

Many unique properties

Electronics

Catalysts

Fibre optics

Catalytic converters

Titanium Dioxide Attributes and Applications

Pigment

Opacity (whiteness)
UV resistant
Non-toxic and inert

Paints and coatings
Paper
Inks
Packaging

Titanium Metal

High strength to weight ratio
Corrosion resistant

Aircraft engines and frames
Defence armourments
Chemical & desalination plants
Medical applications
Sporting equipment

Welding Flux Agent

Corrosion resistant

Steel construction
Ship building

Nanomaterials

Many unique properties

Dye-sensitised solar cells
Water purification
Cancer treatments
Noise absorption

Robust Longer Term Demand Growth

Urbanisation

**Consumption based
growth in developing
economies**

**Increasing array of
applications**

Urbanisation and Tiles

- Large urban population and floor space increases in developing countries
- Growth regions have preference for tiles as floor covering

China Urban Residential Floor Space

Source: Global Insight (2011), BHP (2011), RBS (2012)

Tile Use as Floor Covering

Source: Ceramic World Review (2000-11)

Consumption Based Growth

- Developing economies moving from investment to consumption based economic growth
- Rising incomes and living standards create S-curve demand trend

Motor Vehicles Per Capita 2010/11

China Motor Vehicles Per Capita 1985-2011

Increasing Array of Uses

Zircon Chemicals Applications

- Catalytic converters
- Nuclear fuel rods
- Oxygen and pressure sensors
- Fibre optic connectors
- Electrical motherboards and capacitors

Titanium Metal Applications

- Desalinations plants
- Offshore oil and gas components
- Power plant cooling systems
- Aerospace
- Nanotechnologies

Iluka's Position in Mineral Sands

- #1 global producer of zircon
- Significant producer of titanium dioxide – particularly high value products

Major Zircon and Titanium Dioxide Feedstock Producers

**Zircon
(2011- 1.4mt)**

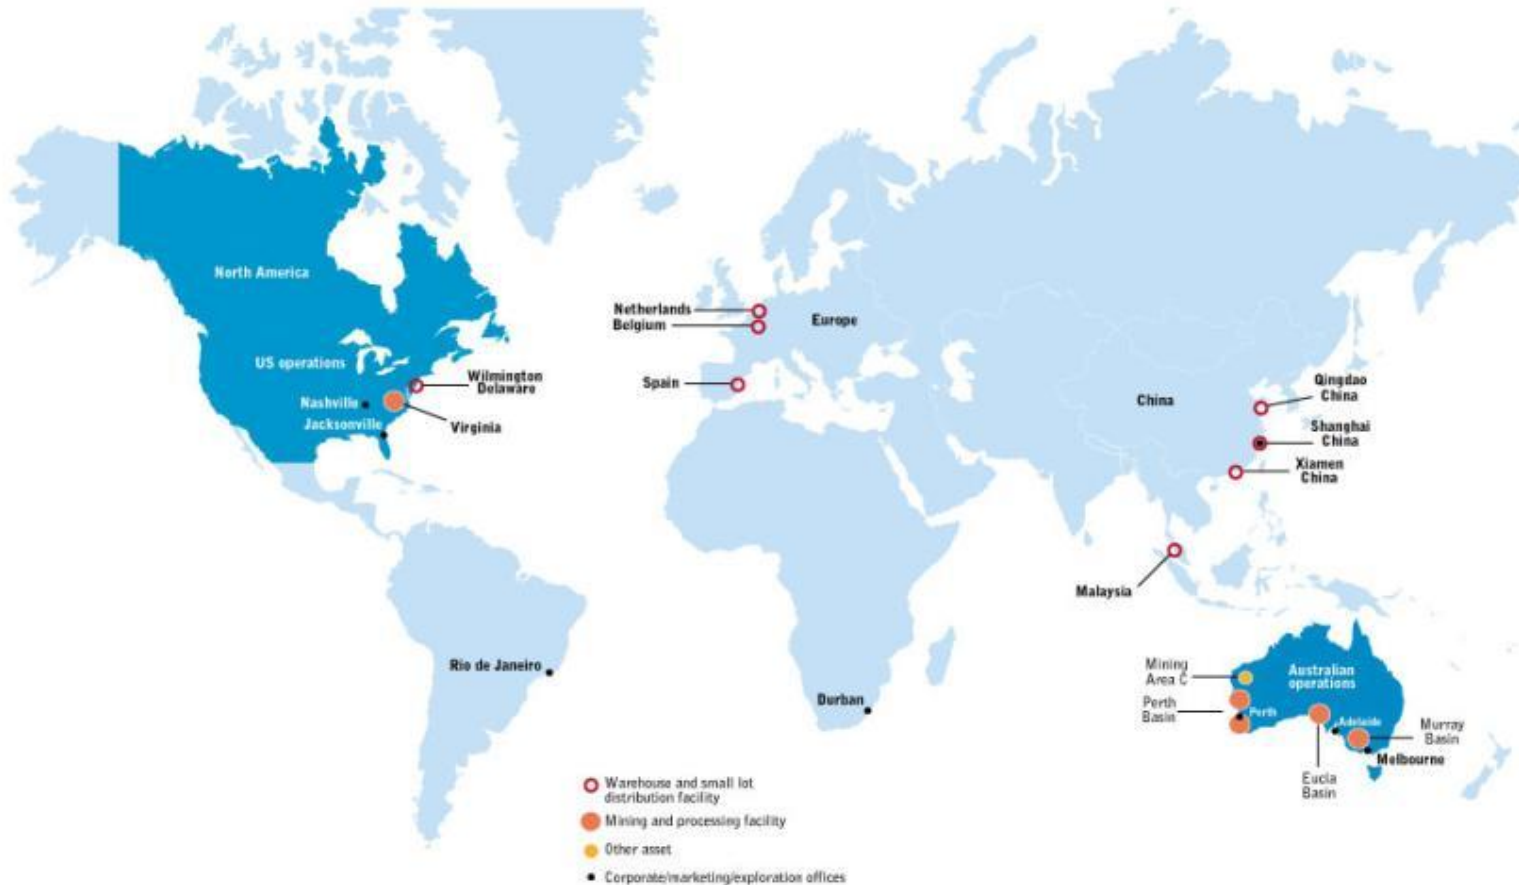

**Total Titanium Feedstock
(2011- 6.5mt)**

Source: Iluka, TZMI

Note: Rio Tinto includes 100% of Richards Bay Minerals

Iluka Operating and Marketing Locations

- Mining and processing operations in Australia and USA
- Distribution warehouses in major markets
- Zircon and titanium dioxide products supplied to more than 35 countries

Investment Proposition

- Objective: create and deliver value for shareholders
- Key performance metric: return on capital, internal proxy for return on equity
- Focus on margins and shareholder returns through the cycle
- Production flexibility approach in downturns and recoveries
 - reduce production and costs
 - build inventories and cede market share
 - leverage response to demand recovery via rapid response capability (>500kt Z/R/SR)
 - protect long term growth options

Key Financial Metrics

Recent Financial Performance	2012	2011
EPS (cents)	87.1	130.1
Free Cash Flow (\$m)	81.2	589.6
Cash Flow per share (cents)	19.4	140.6
Return on Capital (%)	32.8	54.9
Return on Equity (%)	23.2	42.5
Net Debt (\$m)	95.9	(156.7)
Gearing (net debt / debt + equity)	5.8	N/A

Dividend History 2010 - 2012

- Cumulative payout ratio (% FCF adjusted*) of 82%

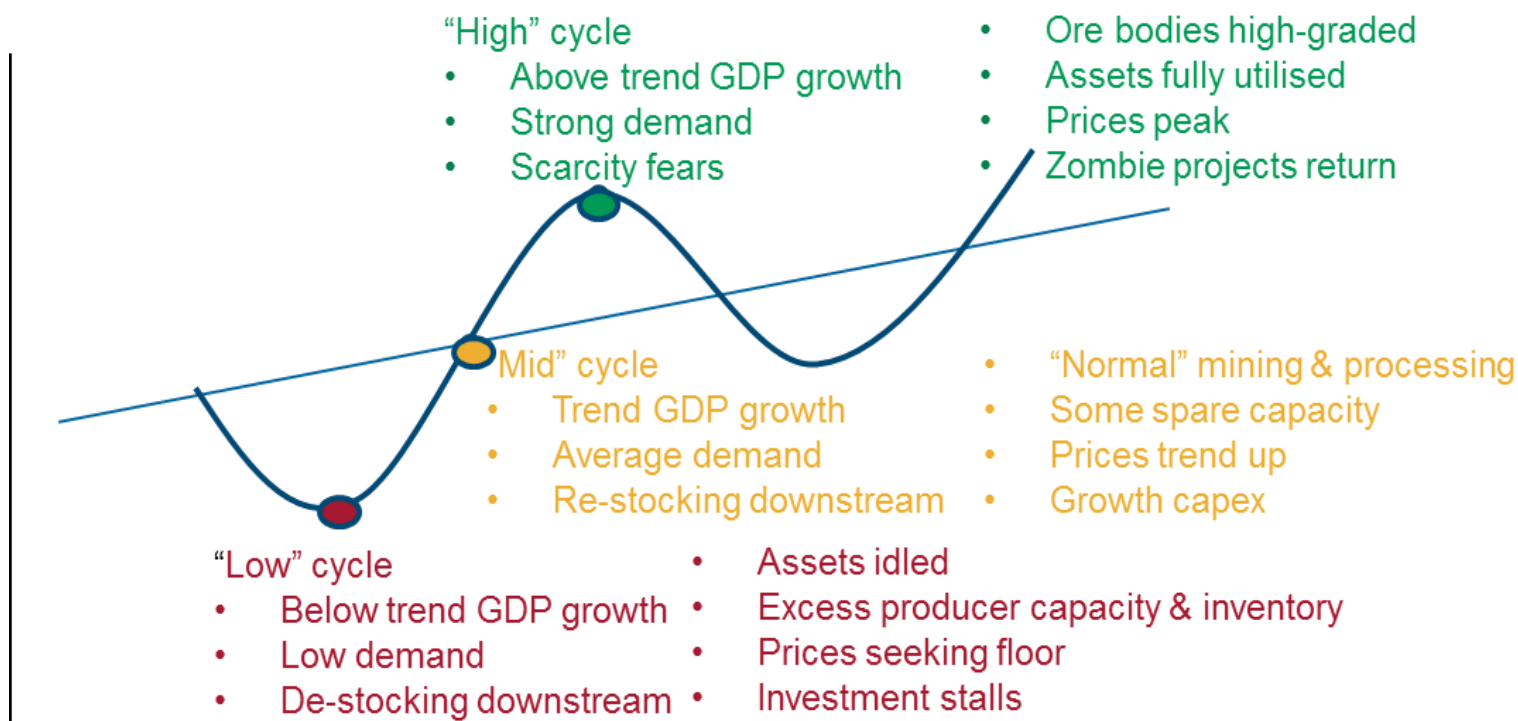

* Free cash flow adjusted to align cash tax payments with corresponding earnings period.

^ Annual dividend payment relative to share price on results announcement (VWAP)

Business Cycles in Mineral Sands

Illustrative Mineral Sands Business Cycle

Iluka's Production Approach

- Annual variations, but production = sales over time

Iluka's Production Approach

- Inventory build and initial production response in 2012
- Further production response implemented in 2013
 - 2013 zircon/high grade TiO_2 production guidance ~ 30-40% of capacity
- Reduction in 2013 operational cash costs versus 2012
 - workforce reduced by ~30%
 - cash production costs down ~35%, total cash costs down ~20%
- Reduction in capital spend to ~\$100m while preserving growth options
- Focus on maintaining robust balance sheet
- Focus on returning maximum cash practicable to shareholders through cycle

Recent Market Factors

- Global and regional economic conditions and policy settings
- Coincident reduction in zircon and high grade titanium feedstock demand
- Inventory levels and destocking in downstream industries (ceramics and pigment)
- ‘Legacy’ contracts roll off leading to multi-tiered pricing for high grade feedstocks
- Historically low pigment plant yields
- High grade feedstock demand linked to pigment plant utilisation and yields
- China pigment capacity and export/import balance

Zircon

- Major producer production response: ~35% production capacity idled vs 2011
- Strengthening in demand for zircon during Q1 2013
 - marked increase in inquiries with follow through to ordering
 - across most major markets, Europe the exception
- China zircon market showing broad based improvement
 - re-emergence of demand in housing and commercial sectors
 - recovery in foundry and refractory demand
- Zircon price stabilised

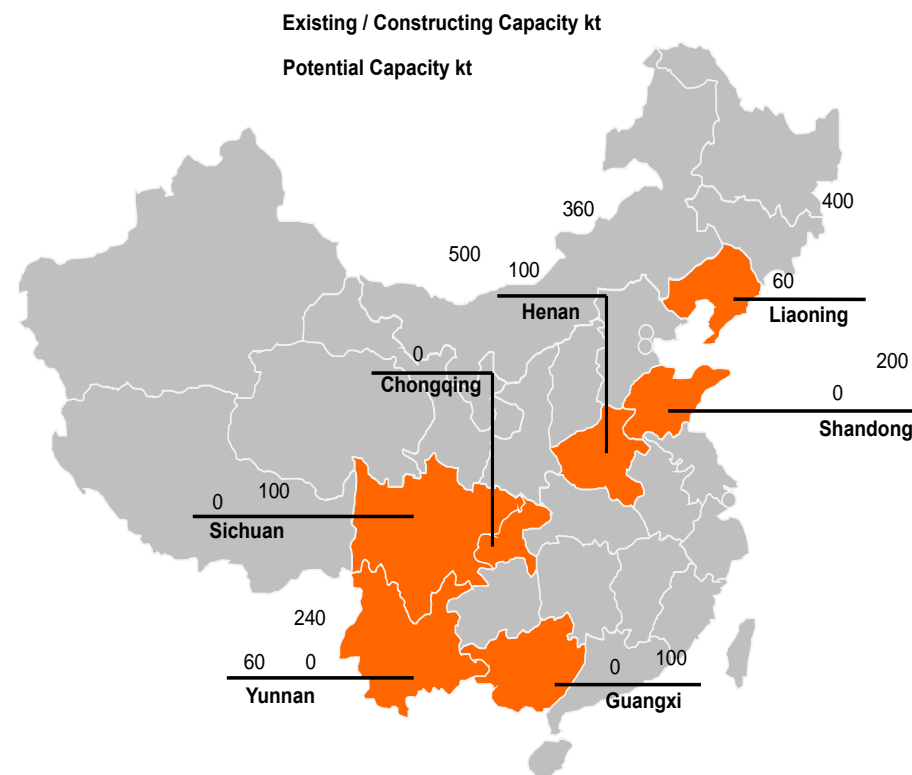

High Grade Titanium Dioxide

- High grade titanium market subdued
 - pigment plant utilisation levels low
 - legacy contract material preferred
- Major producer production response: ~20% production capacity idled vs 2011
- Pigment industry expecting stronger second half of 2013
 - positive US housing data
 - excess inventory being addressed

Chloride Process Pigment in China

- Chloride pigment rapidly evolving in China
 - one chloride pigment plant operating
 - two under construction
 - three in planning stage
- MIIT* anticipates 300ktpa chloride process capacity by 2014
- Chinese government policy encouraging use of high grade titanium dioxide feedstocks

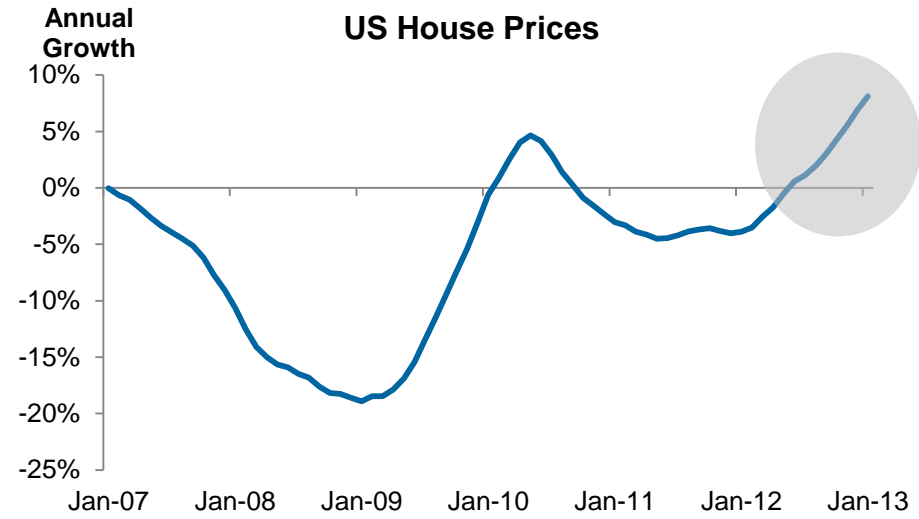

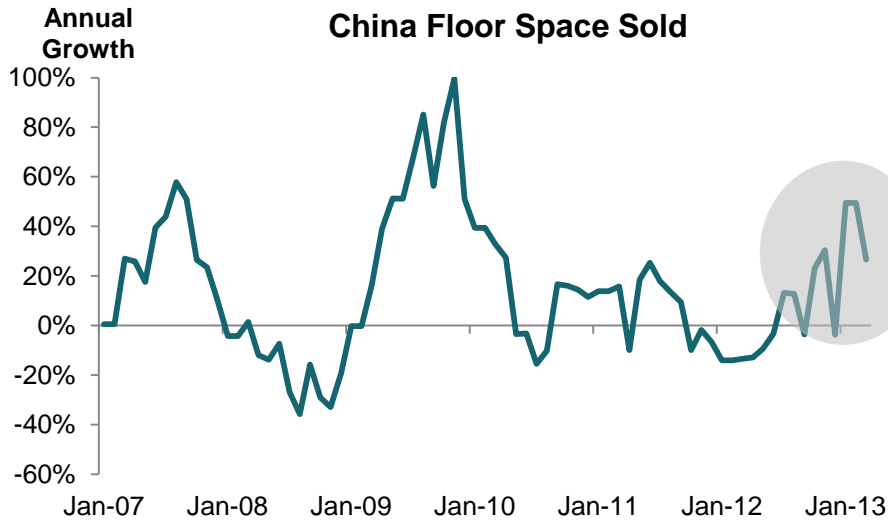

Chloride Process Projects in China

*MIIT: Ministry of Industry and Information Technology

Source : CMGroup, NDRC, MIIT

Encouraging Lead Indicators

2013 Areas of Focus

- Maintain implementation of agreed strategies – “stay on course”
- Execute well in terms of market development, new product development
- Operate assets in line with market demand
- Preserve/advance mineral sands growth opportunities
- Maintain conservative balance sheet
- Continue to evaluate/pursue new corporate growth opportunities
- Focus on shareholder returns through cycle
